How UAE Pass Addresses These Challenges

Secure digital identity management

Streamlined, efficient verification processes

A single digital key for multiple services

Our Integration Services

Seamless Connectivity, Tailored for Success

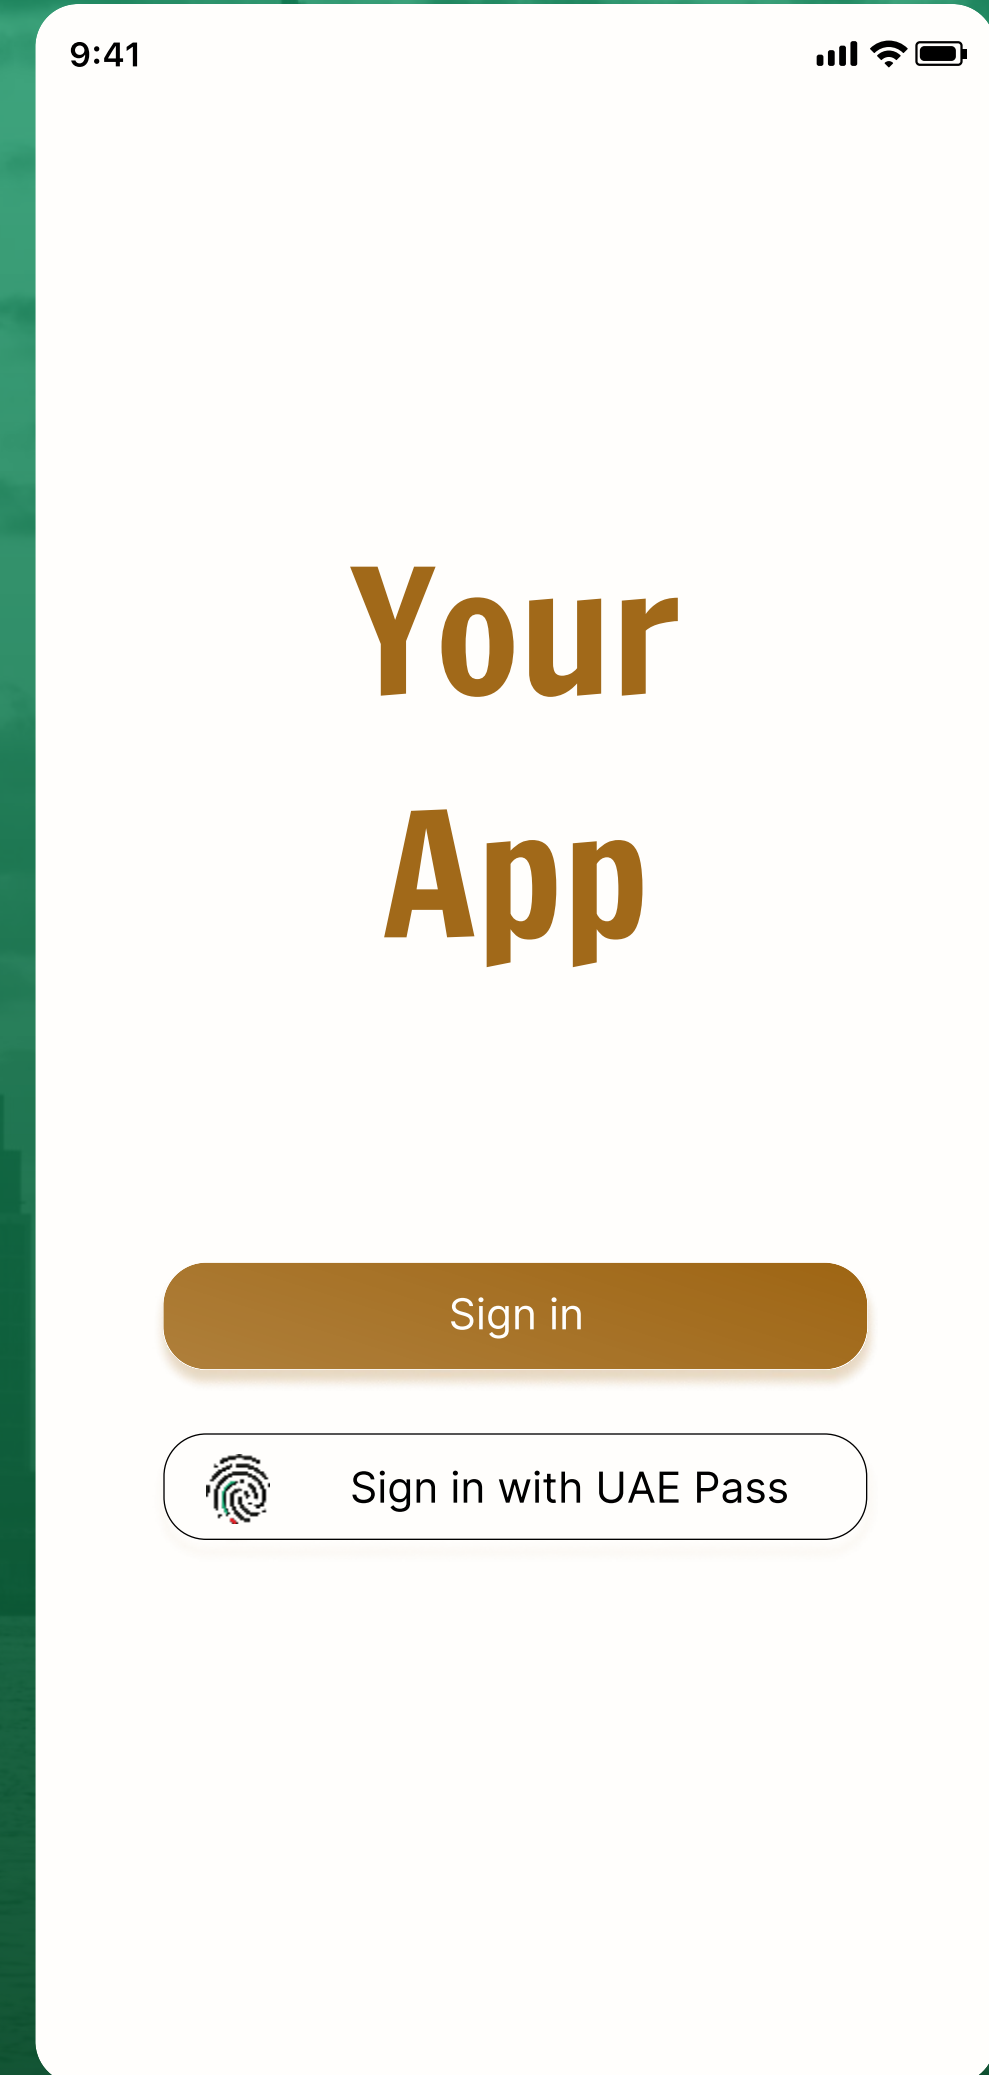

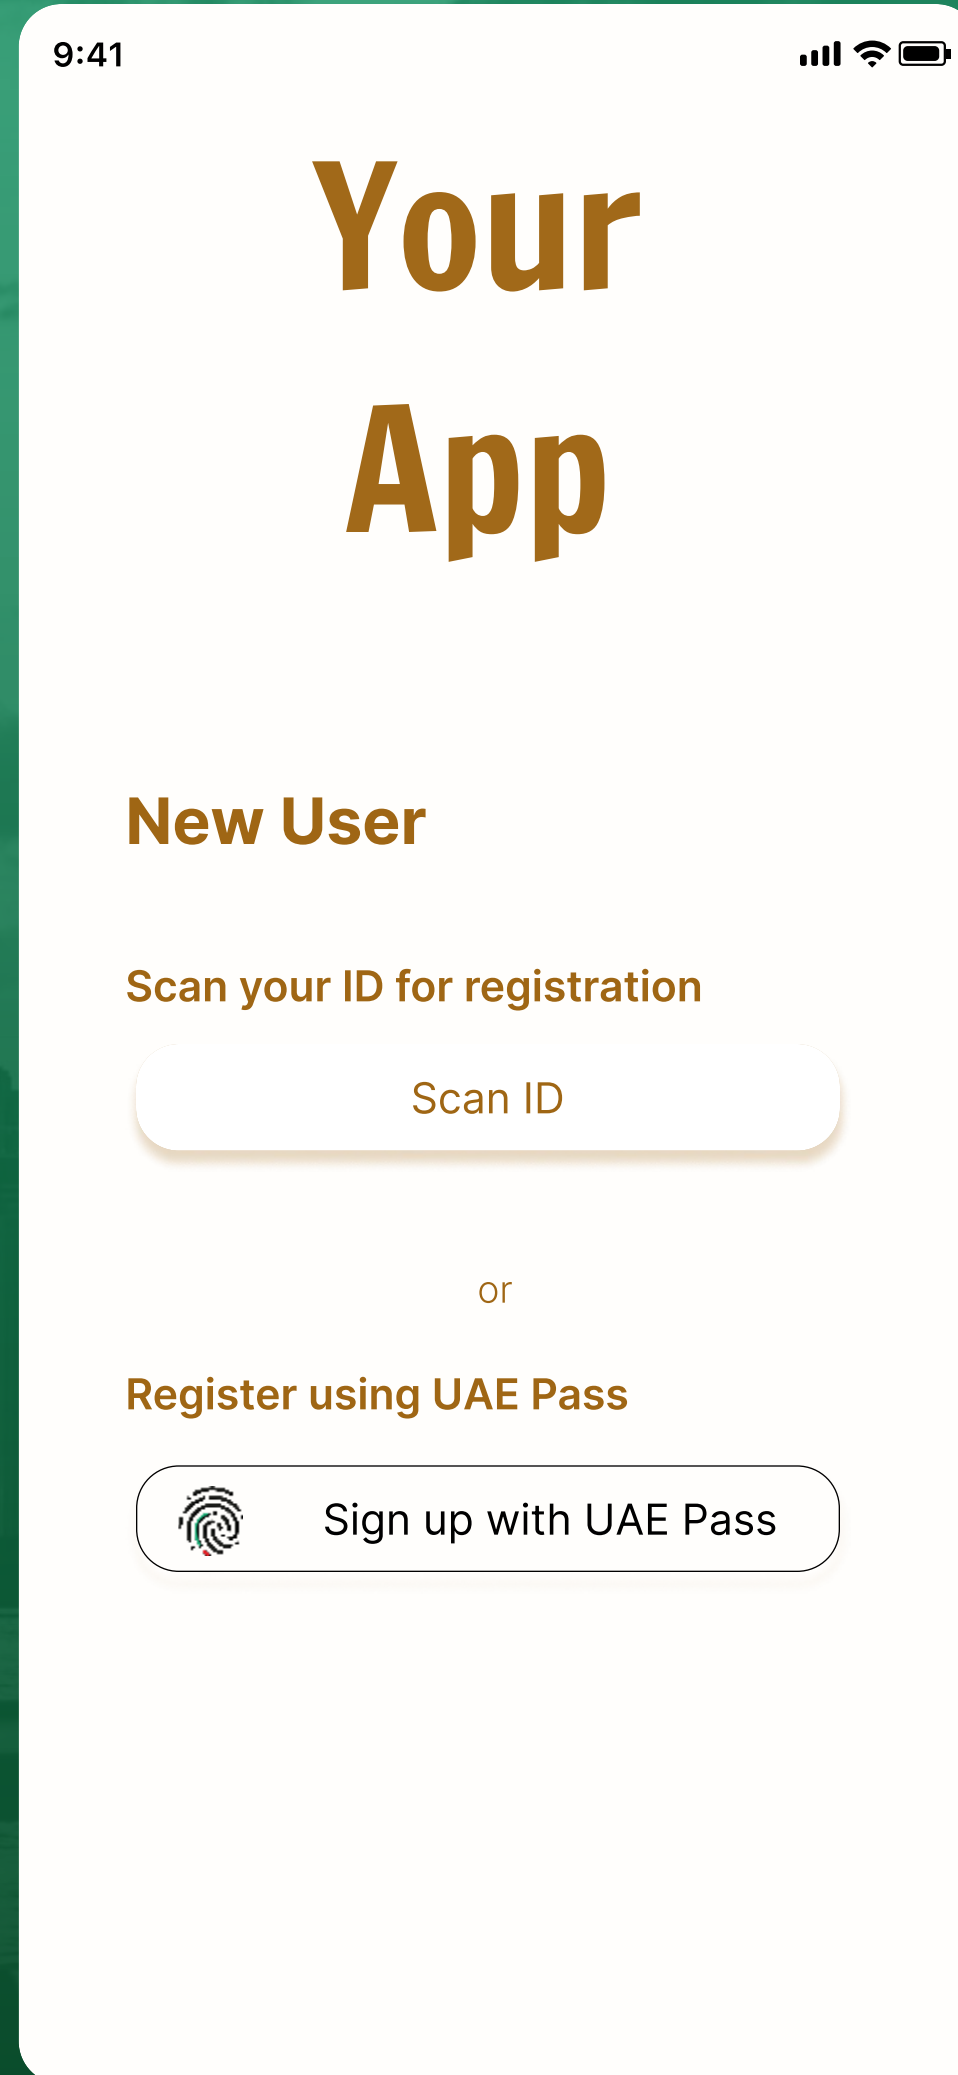

Seamlessly integrate UAE Pass and UAE ID Reader into your front desk app for efficient client personal information retrieval

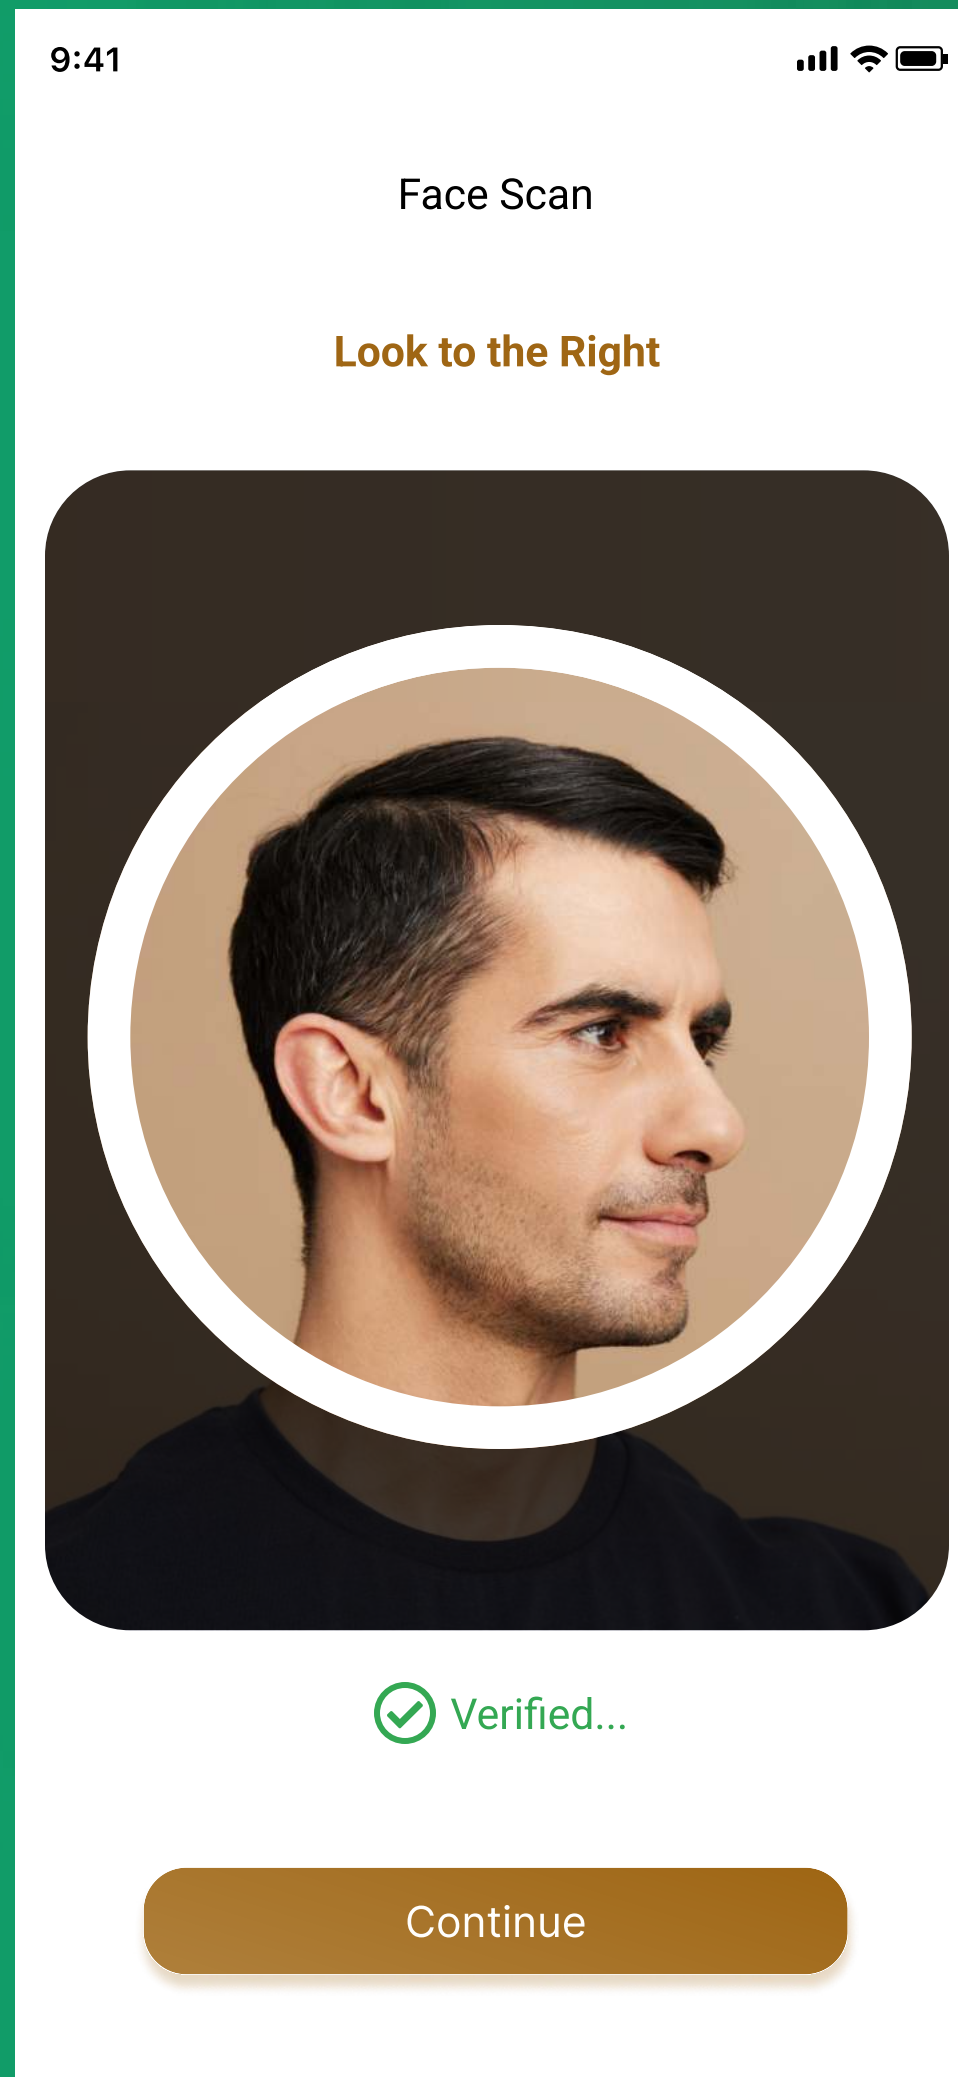

The screenshot displays the 'YourApp' user interface. At the top, there is a navigation bar with icons for 'Jobs Search', 'Companies', 'Salaries', and 'Careers', along with a notification bell and a profile icon. The main content area is divided into a left sidebar and a right main panel. The sidebar, under the heading 'Account Settings', lists several menu items: 'Profile', 'Settings' (with a dropdown arrow), 'Overview', 'Sign in method', 'Basic Information' (highlighted in orange), 'Connected account', 'Notifications', 'Deactivate account', 'Billing', 'Referrals', and 'Invite a Friend'. The main panel is titled 'Basic Information' and contains the following fields: 'Personal Photo' (with a circular placeholder and buttons for 'ID Reader' and 'UAE Pass'), 'Full Name' (split into two input boxes containing 'Katie' and 'Pena'), 'Company' (input box with 'Company name'), 'Contact phone' (input box with a country code dropdown set to the USA and 'Phone number'), 'Company site' (input box with 'Company name'), 'Country' (dropdown menu with 'Select a country'), 'Language' (dropdown menu with 'Select a language'), 'Time Zone' (dropdown menu with 'Select a timezone'), 'Currency' (dropdown menu with 'Select a currency'), 'Communication' (checkboxes for 'Email' and 'Phone', with 'Phone' checked), and 'Allow Marketing' (toggle switch). At the bottom right of the main panel, there are two buttons: 'Discard' and 'Save changes'.

Our Integration Services

Seamless Connectivity, Tailored
for Success

Enable smooth login and registration in
your mobile app with UAE Pass integration
or ID scanning process for user
convenience.

Authenticate Live Faces Against Document Images

Real-time verification linking live facial recognition with a scanned document

Ensure the consistency of an individual's identity by comparing their images. This process allows for the matching of a person's face from a variety of sources, including printed documents, RFID chip images, selfies taken from web or mobile devices, or external photos stored in your database, all within a single request.

Documents process

| | | |
|--|--------------------|-----------------|
| | ID Number | رقم الهوية |
| | 123-1234-123456-1 | |
| | Name: Mohamed Omer | الاسم: محمد عمر |
| | Date of Birth | تاريخ الميلاد |
| | 00/00/0000 | 00/00/0000 |
| | Nationality | الجنسية: |
| | Issuing Date | تاريخ الاصدار |
| | 00/00/0000 | الجنس : ذكر |
| | Expiry Date | تاريخ الانتهاء |
| | 00/00/0000 | Sex : M |

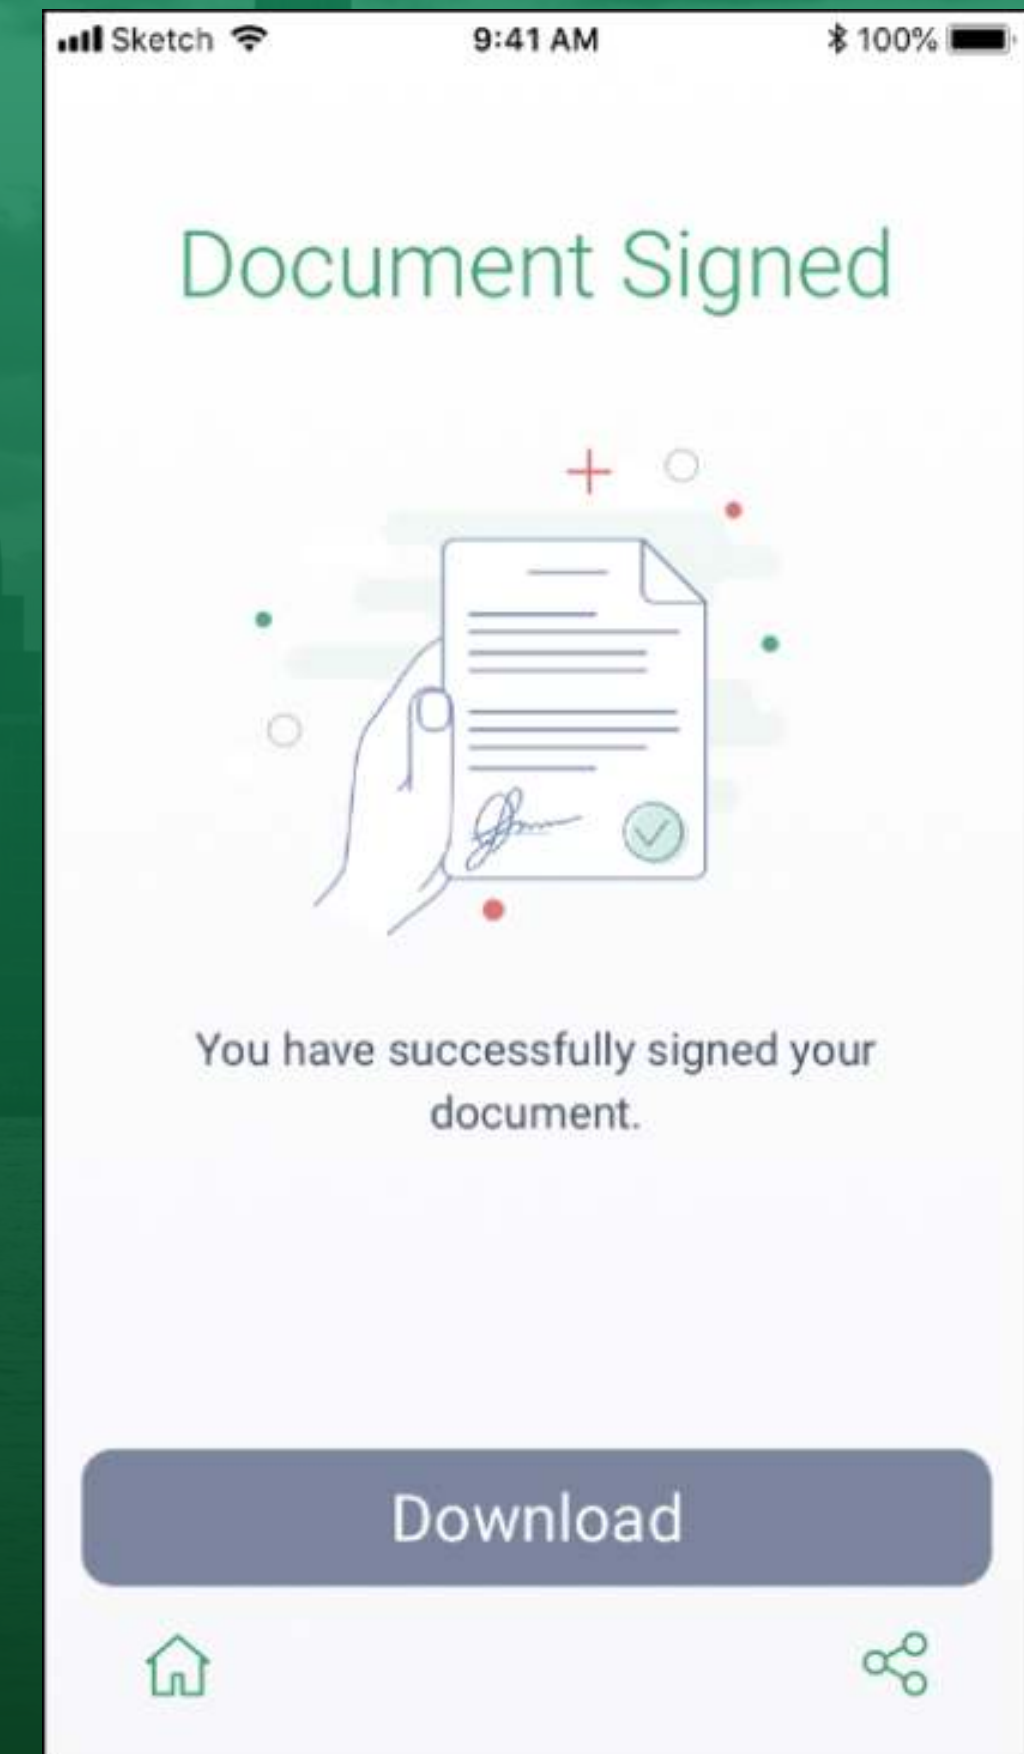

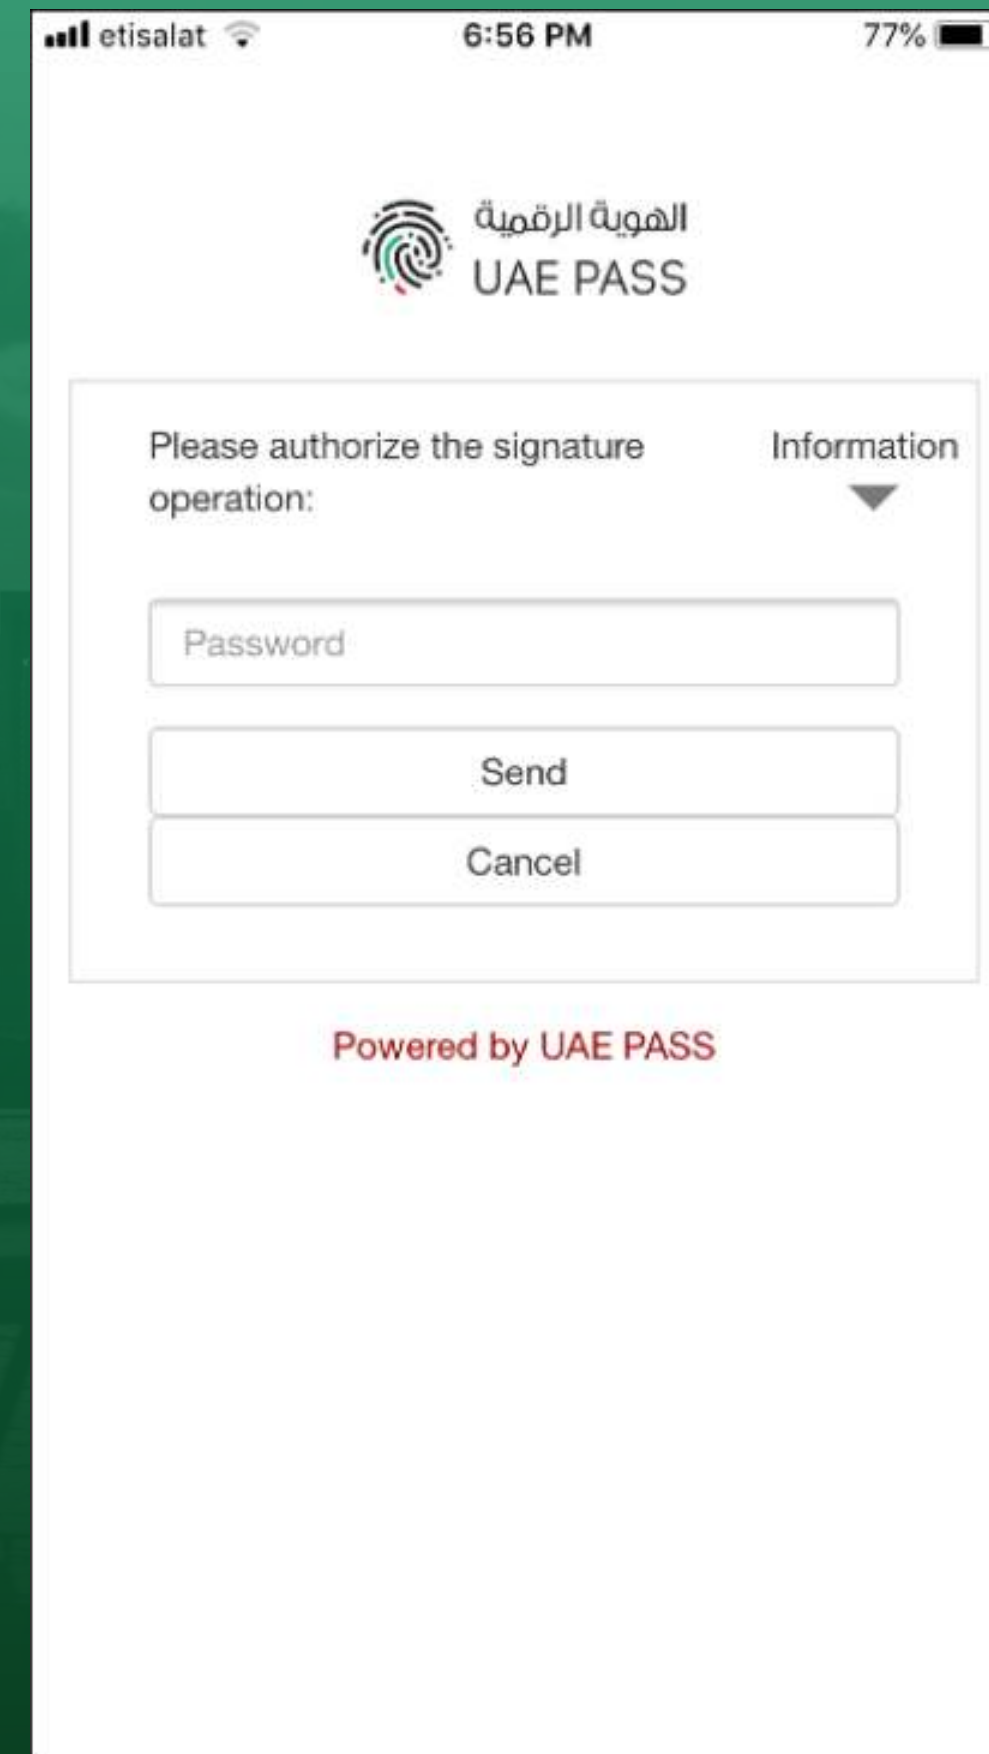

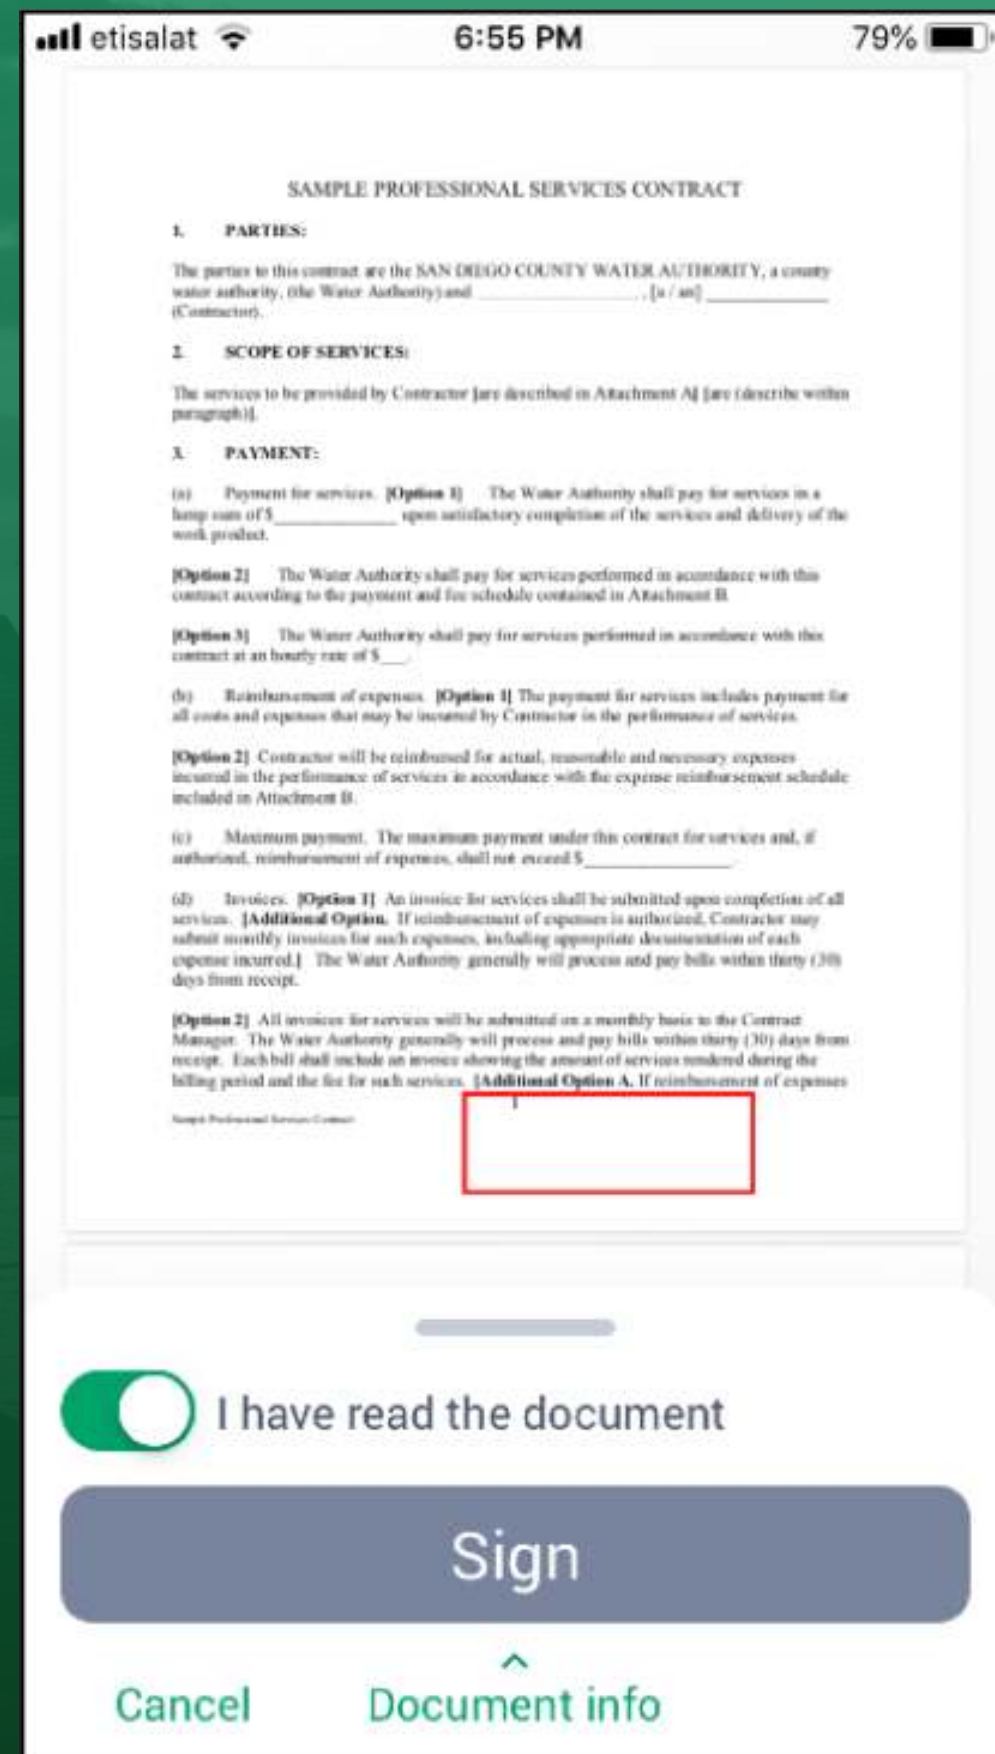

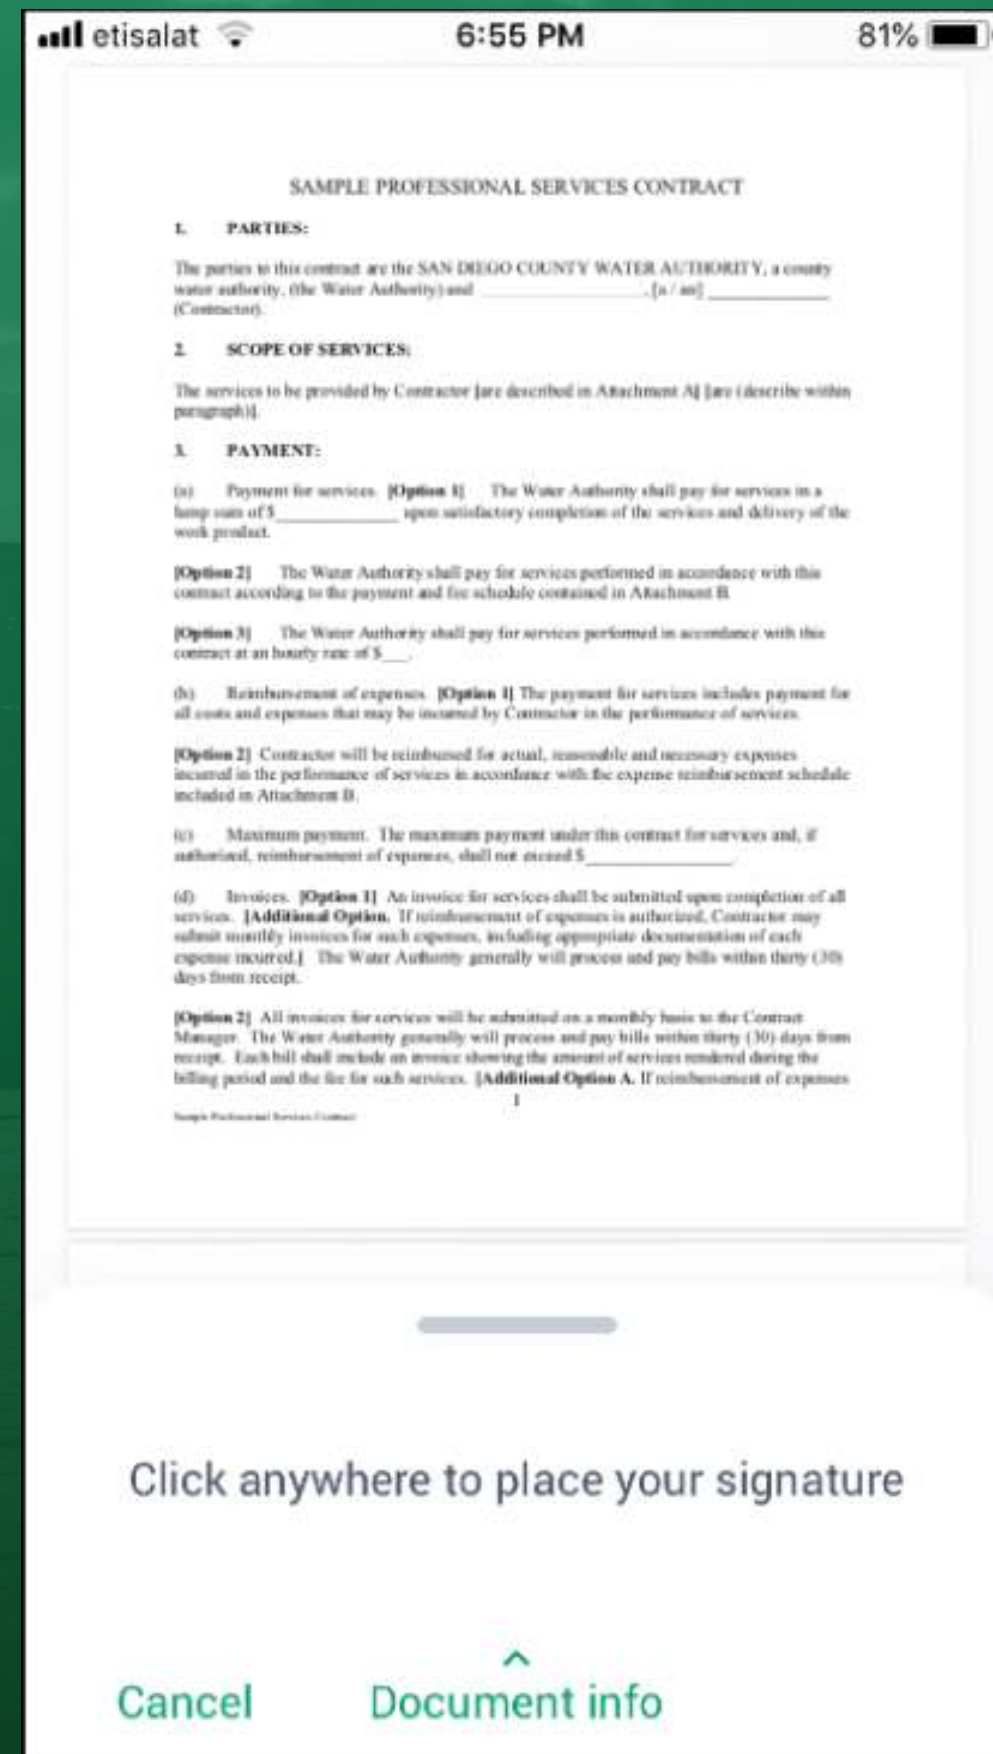

Achieve document verification and customer integration in just seconds.

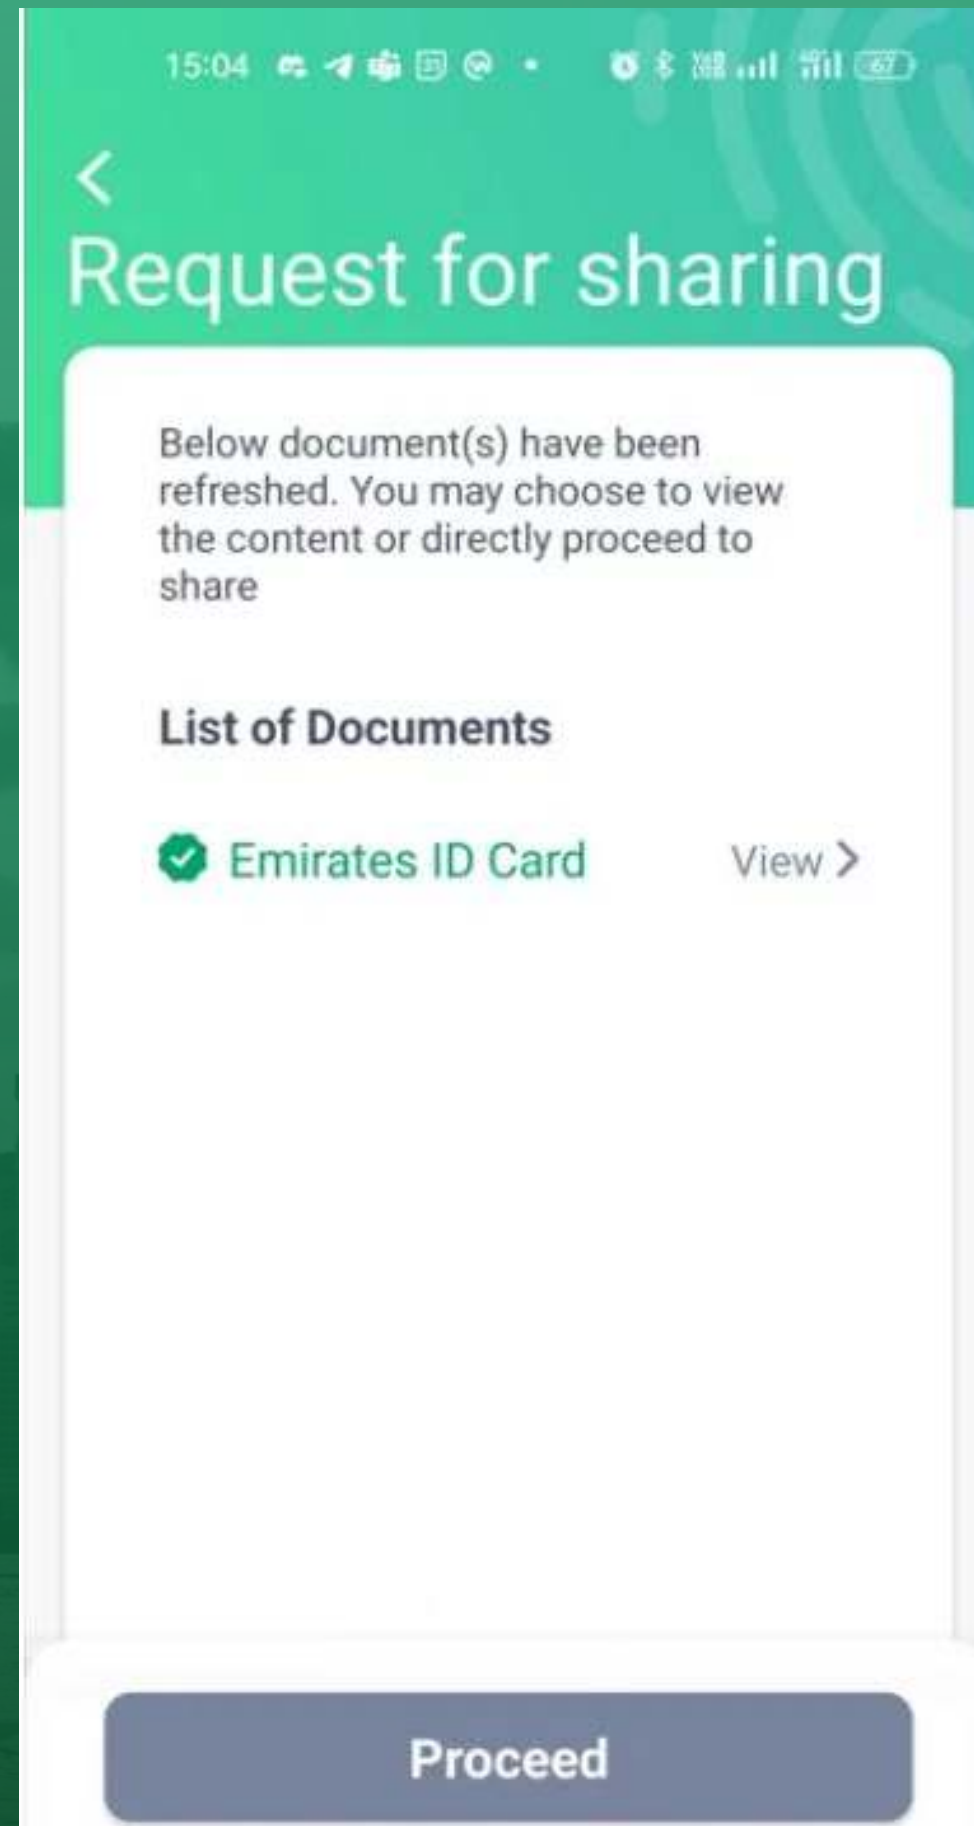

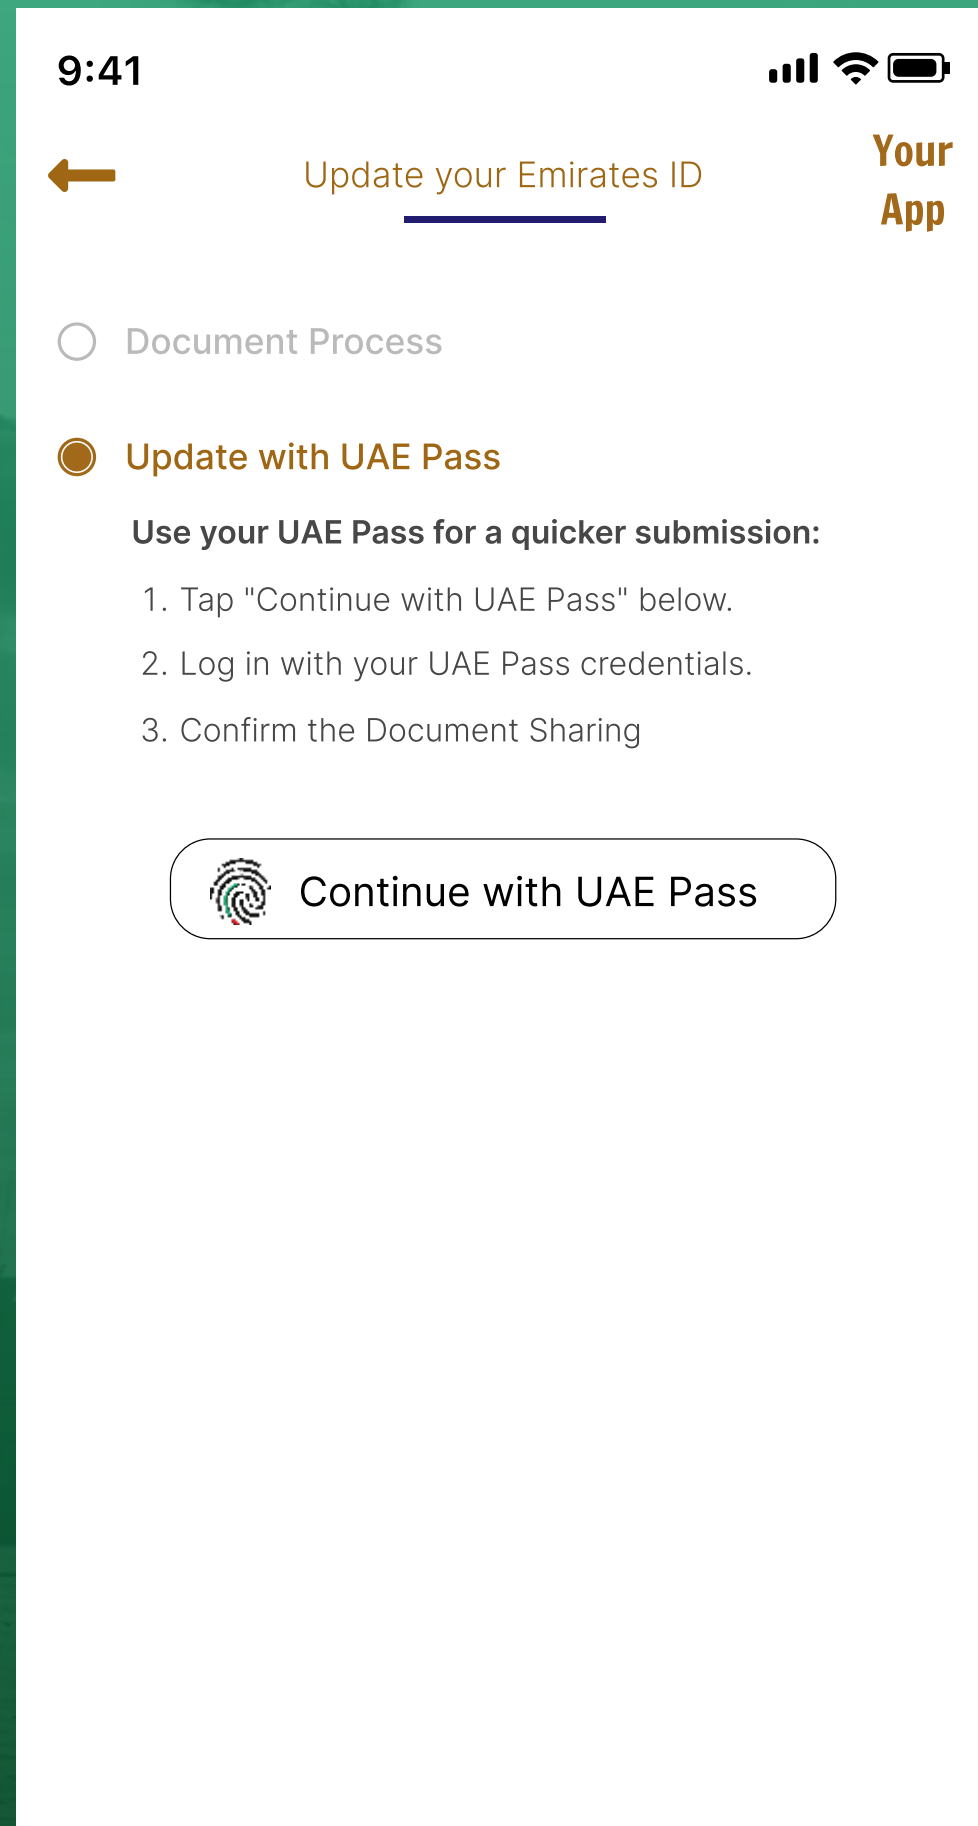

Exceptional scalability ensures smooth processing during high-volume periods, accommodating any quantity of identity documents.

Tailor the onboarding experience across all platforms: mobile, web, or passport scanning devices.

Simplify Signing with UAE Pass Digital Signatures

Elevate security and convenience in document authentication with the trusted UAE Pass signature solution

Documents Sharing

Empower Your Business with UAE Pass Document Sharing Integration

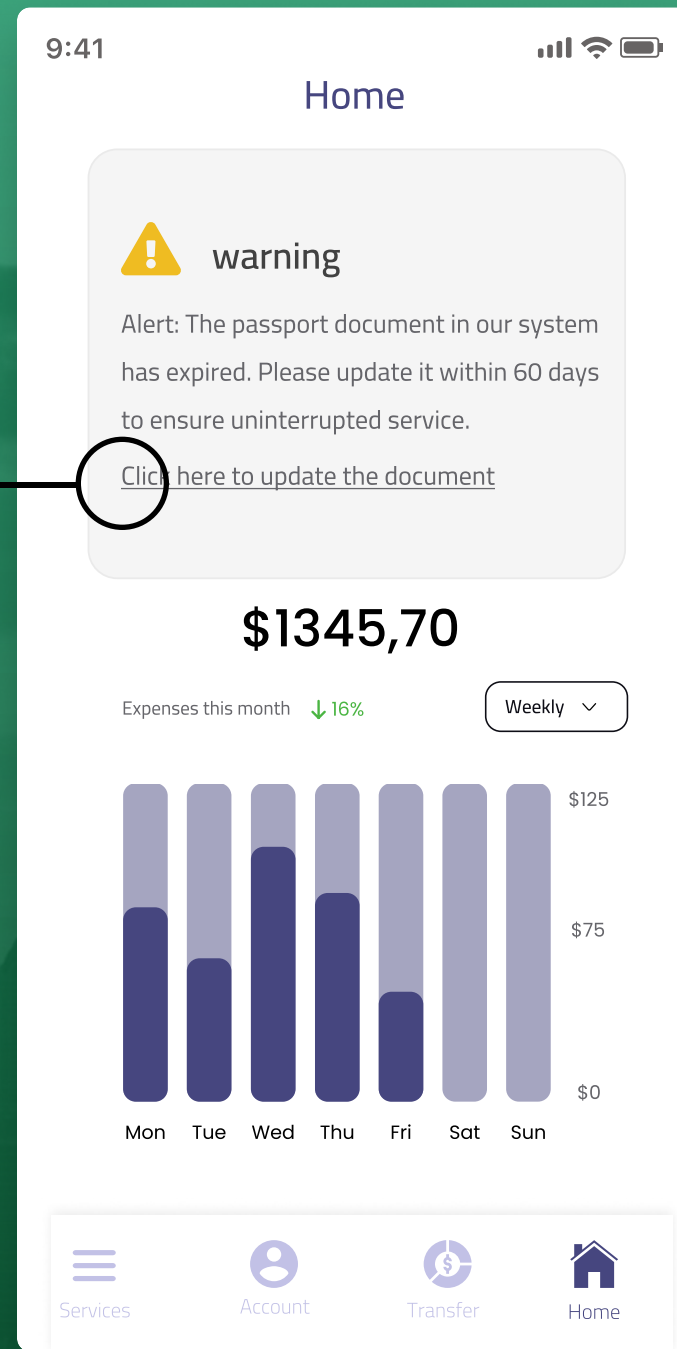

Leverage our expertise to integrate UAE Pass's secure document sharing capabilities directly into your existing systems, enhancing your operational efficiency and data security.

Industry-Specific Solutions

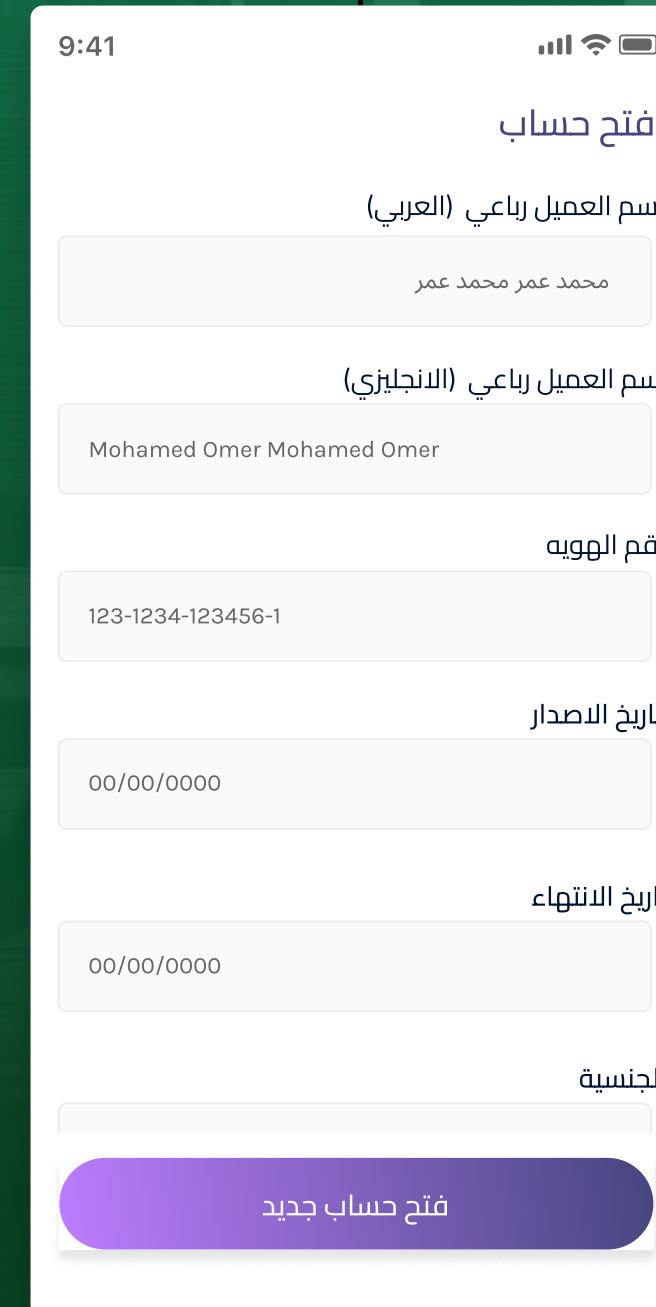

Using UAE Pass Document Sharing to update expired document such as: Emirates ID

Using Document Process to update expired document, such as: Passport

Using Document Process/ Sharing service to create a Mobile/ Bank account

use case Banking Sector

1. Creating mobile banking account

User Verification: Leverage UAE Pass API for initial identity checks.

Document Verification: scan and verify the identity documents required by the bank.

Data Validation: Compare collected data with bank's criteria to ensure KYC compliance.

2. Open a new Banking Account

Identity Authentication: Use UAE Pass for identity verification.

Additional Document Collection: Employ an option to verify extra required documents for account types

Compliance & Approval: Use automated checks for KYC/AML compliance, then finalize account creation and obtain digital signatures with UAE Pass

3. Update expired document

Notification & Scanning: Alert users about document expiry and prompt for a new scan.

Verification & Processing: Authenticate new document and update details, ensuring consistency with UAE Pass.

4. Reset password or pin number

Identity Verification: Use UAE Pass for verifying identity in sensitive actions like password or PIN reset.

Enhanced Security Check: Optionally add a document scan for extra security.

use case CarRental

1. Initial Sign-Up and Identity Verification

Use UAE Pass for customer authentication during the booking process. This ensures the customer's identity aligns with a trusted source.

2. Driving License Verification

After identity authentication, implement a document verification step for the driving license. This confirms the customer's eligibility to drive by checking the license's authenticity, validity, and extracting essential details

3. Rental Agreement and Digital Signature

Following successful verification, prepare a digital rental agreement for the customer's signature, utilizing digital signing capabilities for a streamlined process

Using UAE Pass to get customer info

Using UAE Pass Digital Signature feature to create a valid rental contract

using Emirates ID Reader integration to get customers basic info
